Forecast for Friday 18 Jun 2021

Weather: Friday will be largely dry and cloudy across the Brecon Beacons, with the best of any brighter spells developing across western parts of the area during the morning. It continues rather cloudy throughout the afternoon, again the best of any sunshine reserved for the west. Small risk of rain spreading in from the east late afternoon or early evening, however cloud is expected to break up readily after dark.

Chance of cloud free mountain/hill tops above 600m: 80% throughout dropping to 70% late afternoon.

Visibility: With cloud bases above summits, visibilities generally good if not very good with distant hills visible. Small risk light rain and lower cloud with bases from 700ft edging across eastern areas late in the afternoon, resulting in visibilities dropping to moderate.

Meteorologist's View

It will be generally cloudy, however the cloud is expected to break up a little which may result in strong sunshine, therefore sun protection is recommended if you plan to spend much of the day in the mountains. There is also some uncertainty over the extent of rain moving north and west Friday, so some wet weather gear would be advisable.

Recent rainfall: measured at Neuadd: altitude 353m
